Sculpe was a US Army Ranger, who was paralyzed in an IED attack while serving in Afghanistan. He has since become one of our greatest advocates for veterans and he helped to create the hugely successful Mission Continues organization. So this book is mainly about him, but it's a moving story about what it's like to be paralyzed, with the hope of helping veterans adjust to life after that initial struggle. Sculpe also opens up the door to the possibility of one day walking again. But a lot of that story is about injuries to the brain — something I came to in a different way. Years later, I was part of a team that found out I had a brain tumor. The surgery lasted for most of a day and more than a year later, I woke up feeling a bit like Superman after his resurrection from the dead. I was able to use my whole body again — though with limitations. Help Grist raise \$20,000 by 9/30. Just click the image above  My brain was no longer paralyzed. No, that was no longer my biggest problem. It was how I could understand and recover from the damage. I learned that in a fight-or-flight reaction you aren't aware of the damage that occurs to your body. That was especially hard to cope with since my brain was not responding normally. But all the brain damage is not the whole story. I had a terrible time for some time after my injury. I remember how awful it was to suddenly be slow and forgetful. And it seems that people who were not injured or not with the Army look at vets like we're crazy, or pretending to feel bad that we feel good. The brain injury is one aspect of the TBI, traumatic brain injury. The brain has many different levels of damage. There is the initial trauma that can damage the brain directly, and then there is the immediate effect of the trauma on the body 82138339de
